width 1.420 mm		*anthracite*	
depth 655 mm	*silver*	*light gray*	*electric*
height 850 - 1.250 mm		*white*	

BENCHTOP

Material	Equipment	Tool holder
beech	*grooved milling*	*Workbench Protector*
		Clamping for filing nail

ARMRESTS

Variant	Material
4D	*artificial leather*

MIDDLE SEGMENT

under Benchtop
chipdrawer

TECHNOLOGY

Technology pre-setup
Technical back panel
Modular technology rail
cable gland
Adapter for workstation lights

Containers
Two different containers with drawers and compartments.

MODULAR II

Engraver´s Bench

Standard size: 1.450 x 690 mm | *dimensions customizable* | *accessories customizable* | *benchtop customizable* | *additional options*

Example Configuration

With the MODULAR II, you can design your workspace according to your preferences. The thoughtful construction of the robust four-legged steel frame with an open side view is ideal for versatile use. Four internal hydraulic cylinders, each with a lifting capacity of 150 kg, allow the inner steel frame to telescope upwards.

OPTIONS

HYBRID SYSTEM

Precision in Symbiosis:
The HYBRID SYSTEM for Goldsmiths and Stone Setters

Where traditional goldsmithing ends and high-precision stone setting begins, the workbench must not be an obstacle – it must become the link. Our hybrid workstation system was developed specifically for this interface, creating a seamless connection between robust shaping and the finest detail work. Thanks to modular interfaces for microscope arms, compressed air, and integrated extraction solutions, the bench can be adapted to any workflow in an instant.

Our hybrid system provides the uncompromising infrastructure that professionals need to take their craftsmanship to the next level.

Discover the next generation of workbenches – modular, multifunctional, and perfectly tailored to the synergy between goldsmith and setter.

HYBRID

Juweler- & Engraver´s Bench

Standard size: 1.350 x 850 mm | *dimensions customizable* | *accessories customizable* | *benchtop customizable* | *additional options*

*Our **hybrid workbench** combines goldsmithing and setting within the smallest footprint. Thanks to the interchangeable desktop, the workspace can be transformed in an instant, offering maximum flexibility with minimal space requirements. Furthermore, the modular design allows for individual system expansions at any time. It is the perfect solution for those who refuse to compromise on precision and efficiency.*

UNIQUE
SYSTEM

For us, individuality means more than just choosing from a wide range of modular systems with predefined and optional features. It also includes the ability to ***create entirely customized workbenches tailored to your exact specifications****.*

Our ***UNIQUE system*** *gives you the freedom to redefine the design, structure, and functionality of your workbenches from the ground up.*

Do you have a vision?

We turn it into reality. Our product range showcases a selection of custom-made solutions that not only serve as inspiration but can also be directly reproduced for you. Additionally, we are ready to bring your unique custom designs to life – no matter how specific or innovative your ideas may be.

UNIQUE X *Engraver´s Bench*

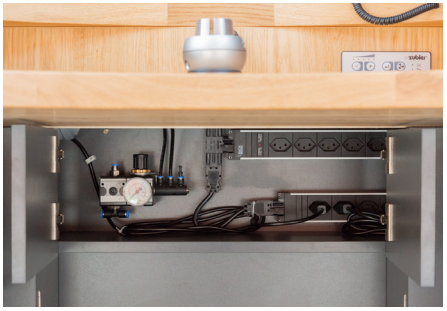
customized production

Bench Frame: Black, extremely sturdy T-leg frame with an open side view.

Dimensions	
width	1.600 mm
depth	800 mm
height	750 - 1.150 mm

*The **UNIQUE X Setter's Bench** is perfectly tailored to the customer's needs and was developed alongside the UNIQUE IX Goldsmith's Bench.*

A variety of custom-made details have been incorporated to meet the high demands for technical equipment. In addition to a dedicated extraction system, the bench features numerous specialized functions.



HIGHLIGHTS

LOWERED WORK AREA

The work area is lowered to ensure optimal use of the engraving ball and microscope. Additionally, height-adjustable, removable elbow supports are attached on both sides for ergonomic working.

SETTER HOLLOW

Optionally, the bench is also available with an integrated settier hollow and adjustable 5D armrests.

INTUITIVE OPERATION

The upper left drawer can house a sharpening device for engraving tools. When pulled out, the extraction system automatically activates, efficiently removing fine grinding dust.

UNIQUE XI *Engraver´s Bench*

customized production

Bench Frame: Highly stable T-leg frame, clad in beech wood.

Dimensions	
width	1.400 mm
depth	760 mm
height	800 - 1.200 mm

*The **UNIQUE XI setter's bench** was specifically tailored to the customer's needs and requirements. The development focused on the tools and machines to be used. A grinding machine for engraving tools has been directly integrated into the bench.*

HIGHLIGHTS

OPTIMIZED WORKFLOW

The anthracite HPL surface is highly resistant to scratches and chemicals. Laminated onto a sturdy solid wood base, it ensures maximum stability. A high lateral and rear upstand made from the same material defines and secures the workspace.

WORKSPACE

Next to the trough lies a cutout for integrating a grinding device. Behind the work recess, a block with multiple slots is available for connecting micromotors and handpieces.

INTUITIVE OPERATION

The rear rack allows flexible attachment and positioning of various components, such as microscopes, monitor holders, bur holders, and handpiece rests.

UNIQUE XIV *Engraver´s Bench*

customized production

Bench Frame: Highly stable aluminium T-leg frame.

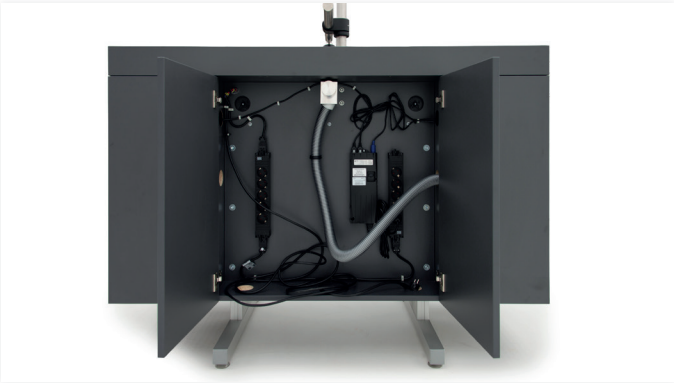
Dimensions	
width	1.500 mm
depth	805 mm
height	1.150 - 1.550 mm

*The **UNIQUE XIV setter's bench** is the result of rigorous customer focus. Every detail has been precisely tailored to specific workflows. Machines and tools—such as the graver or the extraction system—have their own dedicated places to guarantee maximum efficiency and focus while you work.*

HIGHLIGHTS

INTEGRATED EXTRACTION

The extendable suction pipe can be effortlessly pulled into the desired working position. When not in use, the pipe slides back completely and is concealed by a flush-fitting cap, maintaining the flawless appearance of the work surface.



CENTRALIZED MANAGEMENT

Systematic order: The rear panel provides easy access to all technical components. Cables and hoses are bundled in one central location, keeping your workspace clutter-free.

ERGONOMICS & STORAGE

Clever design: Both the intuitive height adjustment and the storage units are mounted on the outside of the frame. This ensures maximum legroom and an uncompromisingly ergonomic working position.
